

User Guide | Quick How-To and Features

Team KERBY worked with Mercedes-Benz to create an AI palette system focused on enhancing the driver's experience with entertainment.

1. Start the engine

Press the red button to activate the car monitor.

2. Select a Persona

On the left icon, choose which persona you'd like to speak to. We have 3 options.

3. Say "Hey Mercedes"

- 1) Tap the blue button on the bottom of the screen to ask Mercedes a question.
- 2) You can also say "Hey Mercedes" towards the iPhone. Make sure that you wait until the listening indicator to light up before asking your prompt.

4. Listen to some music on Spotify

Play and pause music. You can use commands like "Hey Mercedes. Skip this song."

5. Test out Gesturing

- 1) Select the Nature persona. On the Android smartphone's camera, present the peace sign with your hand to take an image and narrating the surrounding.
- 2) When the LLM is speaking, present the middle finger to interrupt.
- 3) Present the koreaboo gesture to play some k-pop.
- 4) Present the OK gesture to switch to a random persona.

6. Test out Passive Triggers

Try honking or accelerating the physical minicar to hear our LLM response.

7. Ask for some News

Ask the Football persona "news on [soccer related term]" to hear the latest news.

8. Adjust your Settings

Change the talkativeness and humor level of the LLM.
